# WHAT IS DAPP WALLET?

A DApp Wallet (Decentralized Application Wallet) is a type of cryptocurrency wallet that is specifically designed to interact with decentralized applications (DApps) on blockchain networks like Ethereum, Binance Smart Chain (BSC), Solana, and others. These wallets allow users to securely store, manage, and interact with digital assets and tokens while also enabling seamless access to DApps (such as decentralized finance services, games, marketplaces, and other blockchain-based applications).
